

JAHANZAIB SULEMAN

Software Engineer (Frontend | JavaScript | TypeScript | React | Next.js | UX/UI | Prompt Engineering)

+49 162 8336890 @jahanzaibsuleman@gmail.com <https://www.linkedin.com/in/jahanzaib-suleman/> Berlin, Germany

SUMMARY

- A competent, focused, and results-driven software engineer with over 12 years of experience leading front-end architecture, process building, and digital transformations.
- Hands-on expertise in **React, Next.js, TypeScript, and modern AI-assisted development workflows** (Cursor, GitHub Copilot, prompt engineering).
- Currently contributing to **AI-driven product development** at **Rhesis AI**, defining frontend architecture and testing interfaces for **LLM applications**.
- Contributed across **Artificial Intelligence, Industrial IoT, Mobility, Health, and Education**, bridging product vision with engineering execution from design to shipment.

CAREER HIGHLIGHTS

- Major Contribution**
Got a chance to contribute to **Careem** (An **Uber** Company) and **TenMarks Education** (an **Amazon** company) as a full-stack engineer.
- Open Source Contribution**
To mark my fraction in open source community, I contributed a feature to **Bootstrap (Frontend Framework)** which is part of v5.
- Teaching at an Institute as Visiting Lecturer**
Along with my primary job, I got an exacting opportunity to teach the undergrads of computer science at **National College of Business Administration and Economics** and **GLIM Institute of Modern Studies**.
- Co-founded an Institute for Computer Science**
To create bridge between industry and academia and to pay back what I owe to this field, I founded my own educational institute for computer science students titled **The Debuggers' Training Institute**.
- Invitee as a Guest Speaker**
Attended seminars as Guest Speaker at **University of Management and Technology** and **Superior College and University** where I spoke to the audience about ongoing affairs in the industry and available opportunities in the field of Computer Science and Web Development.

AWARDS AND APPRECIATIONS

- VenD Rise Annual Award 2019**
Got Value Star award by VentureDive for being best at Customer Satisfaction.
- Appreciation Letters**
Got appreciation letters twice on performance at VentureDive for Careem and Droobi Health.

EXPERIENCE

Senior Frontend Engineer

Rhesis AI GmbH 08/2025 - 11/2025 Berlin

Rhesis AI is a Gen-AI testing platform enabling teams to generate, execute, and analyse automated test suites for LLM applications.

- Led frontend architecture, UI/UX, and processes from scratch, collaborating with the CEO/CTO in a small startup environment.
- Developed dashboards and interfaces for test-scenario generation, execution tracking, and metrics visualization using React, Next.js, and TypeScript.
- Integrated LLM-based workflows and real-time data pipelines to provide insights on AI model performance, robustness, compliance, and domain-specific quality.
- Established engineering best practices, reusable components, review workflows, and cross-team collaboration mechanisms.
- Utilizing AI-powered development tools (Cursor, GitHub Copilot) to accelerate prototyping and ensure consistent code quality.

EDUCATION

BS in Computer Science

The Islamia University of Bahawalpur, Pakistan

09/2009 - 08/2013

SKILLS

AI & Automation Tools

Cursor GitHub Copilot OpenAI API
ChatGPT API Prompt Engineering
Gen-AI Workflow Integration

Frontend

HTML CSS JavaScript React
Next.js AngularJS Redux SCSS
jQuery Bootstrap Highcharts
handlebars Ant Design Material UI
TypeScript Styled-Components

Backend

Node.js PHP Java MySQL Spring

Tools and Technologies

AWS Gulp Grunt NPM Webpack
git Github BitBucket Jira Jenkins
Firebase Rest APIs WordPress Jest
Web Accessibility Cypress Playwright

STRENGTHS

- AI-Enhanced Engineering**
Actively leverage AI tools (Cursor, Copilot) for code generation, review, and productivity improvement.
- Cross-Functional Collaboration**
Proven ability to bridge product, design, and engineering teams in startup and enterprise settings.
- Leadership & Mentorship**
Experienced in building teams, defining processes, and coaching engineers in modern frontend practices.
- Adaptability and Flexibility**
Rapidly adapt to new technologies, domains, and product ecosystems, from Industrial IoT to Gen-AI platforms.

EXPERIENCE

Lead Frontend Engineer

Binary Code Barn

📅 03/2024 - 08/2025 📍 Berlin

Binary Code Barn is an IT consulting company providing solutions from end to end for different platforms using various technologies.

- Leading architectural and engineering decision-making for the team and organization.
- Working with various technologies like HTML/CSS, JavaScript, TypeScript, React, Next.js, etc.
- Ensuring adherence to software engineering best practices and maintaining high-quality, clean code.
- Introducing and optimizing processes to improve workflow, reduce bottlenecks, and ensure high-quality deliverables.
- Collaborating with stakeholders to gather and refine product requirements, ensuring alignment with business goals and user needs.
- Driving the adoption of best practices in software development, including code reviews, automated testing, and continuous integration.

Tech Lead | Frontend Engineer

Strategic Systems International

📅 07/2023 - 03/2024 📍 Remote

Worked here on **Care.com** (A solution to find child care, senior care, pet care etc) as a Tech Lead and contributing on their marketing websites using frontend technologies (HTML, CSS, React, JavaScript, etc), PHP and WordPress.

- Requirement gathering from Product Owners.
- Implementing analytics and the SEO strategies on the websites.
- Keep the code quality high, reviewing code from other developers and suggesting improvements.
- Create reusable components for the design library and improve the existing ones.
- Mentoring the junior peers within the team.
- Helping the company in the recruitment processes.

Frontend JavaScript Engineer

Relayr GmbH

📅 01/2021 - 06/2023 📍 Berlin

Relayr is the Industrial Internet of Things (IIoT) powerhouse delivering the most complete solution for risk-free digital transformations.

- Requirement gathering from Product Owners.
- Worked with different technologies here including JavaScript, React, Typescript, Material UI, Highcharts, Cypress and Playwright.
- Implementing charts and reports on the dashboard to view the attributes and performance of the devices.
- Introducing and implementing best practices for frontend projects.
- Keep the code quality high, reviewing code from other developers and suggesting improvements.
- Create reusable components for the design library and improve the existing ones.
- Mentoring the junior peers within the team.
- Occasionally supporting the QA team in regression testing.

Principal Software Engineer

Strategic Systems International

📅 06/2020 - 01/2021 📍 Lahore

Worked here on **Care.com** (A solution to find child care, senior care, pet care etc) as a Senior developer in their Frontend team.

- Requirement gathering from Product Owners.
- Keep the code quality high, reviewing code from other developers and suggesting improvements.
- Improve and optimize existing components within UI.
- Implement component using React, TypeScript and Material UI.

Senior Software Engineer / Frontend Lead

VentureDive

📅 07/2018 - 06/2020 📍 Lahore

Worked here on **Careem** and **Droobi Health** as Web Engineer and Frontend Lead / Senior Frontend Engineer respectively.

- Develop web applications using JavaScript, React, Redux and Ant Design.
- Lead a team of 7 frontend developers, giving support to the client's multi-cultural team, providing feedback, clarifying requirements and helping with technical questions.
- Keep the Project Manager and the IT Leads updated on the overall progress of the projects and manage the tasks distributed to the team.
- Keep the code and the features implemented by the other developers in accordance to the requirements and doing code reviews.
- Managing application from end-to-end; designing architecture and managing deployments within the project.
- Mentoring the junior peers within the team.

PROJECTS

Gen-AI Testing Platform – Rhesis AI

📅 08/2025 - Present

🔗 <https://www.rhesis.ai/>

Built the frontend for a collaborative platform that empowers engineering, product, legal and domain experts to validate large language model applications.

- Architected UI for scenario builder, metrics dashboard, and execution analytics.
- Enabled integration of LLM APIs, real-time telemetry, and data visualization for model behavior, edge cases, and compliance.
- Defined component architecture, team process, and shipping pipeline in a startup environment.

Elevate (Industrial IoT Dashboard for Elevators)

📅 01/2021 - 07/2023

Developed a real-time **IoT analytics platform** (originally Franz) that visualized elevator health, usage, and predictive maintenance data.

- Designed data visualization and performance modules using Highcharts, React, and Material UI.
- Improved dashboard scalability and responsiveness through component optimization and code refactoring.
- The product was later integrated into CEDES Elevate following Relayr's business merger.

Careem (An Uber Company)

📅 10/2019 - 06/2020

🔗 <https://www.careem.com/>

Careem is a Ride Hailing company which is based in Dubai with operations in over 100 cities in 15 countries in the Middle East, Africa, and South Asia.

- Contributed to interactive web portal for corporate clients known as **Careem for Business**.
- Develop rich and optimized reusable components.
- Refactor or remove existing unused modules.
- Present and demonstrate newly built features to Product Owners.
- Provide real time technical support to customers.
- **Tech Environment:** HTML, CSS, SASS, JavaScript, React, Bootstrap, AngularJS, Ant Design, jQuery, SASS, Webpack, JSP, JSTL, Java, Spring boot, Amazon Web Services, Jenkins, Git, Bitbucket.

Droobi Health

📅 10/2018 - 08/2019

🔗 <https://droobihealth.com/>

Droobi Health has built one of the world's first bilingual digital health therapeutics solutions that is available in both English and Arabic to help people prevent or manage chronic conditions that rely on lifestyle support, such as diabetes and obesity.

- Lead and Manage FE team and distribute tasks.
- Directly involved in managing the application from end-to-end, designing architecture and managing deployments using CI/CD pipelines.
- Meet with clients to gather requirements, design sites, and outline schedules.
- **Tech Environment:** HTML, CSS, SASS, JavaScript, React, Redux, Bootstrap, jQuery, jQuery UI, Ant Design, SASS, Webpack, Git, Bitbucket.

EXPERIENCE

Senior Software Engineer

Arbisoft

📅 08/2015 - 07/2018 📍 Lahore

Mainly worked here on **TenMarks Education (An Amazon Company)** as a Full-Stack Engineer in the Scrum environment.

- Develop interactive web applications with rich user-interfaces using HTML/CSS(SASS), Bootstrap, JavaScript, jQuery, Backbone.js and React.
- Monitored website and platform performance at frontend.
- Direct communication with client for requirements gathering and design layouts.
- Keep the code and the features implemented by the other developers in accordance to the requirements and doing code reviews.
- Facilitated refinement and elaboration of requirements and design.

Web Developer (Remote)

World Academy TV

📅 10/2014 - 07/2015 📍 Sydney

Mainly worked here on **EduMal TV** as a Full-Stack developer. EduMal is an online platform to connect pet owner and animal trainer to each other using Web-RTC.

- Work in a virtual environment to build a product from scratch.
- Develop web applications using HTML/CSS, JavaScript, Bootstrap, PHP and MySQL.
- Work closely with the team to discuss technical solutions and innovative ideas to those solutions.
- Reporting progress to Products Owners.

Web Developer

Syntax Software House

📅 10/2013 - 09/2014 📍 Bahawalpur

Worked here as a Full-Stack developer and made contributions in various big projects like **CABROP Society Pakistan** (A Cattle and Buffalo Management System).

- Develop web applications using HTML/CSS, JavaScript, jQuery, Bootstrap, PHP and MySQL.
- Determining technical requirements and reporting progress to Products Owners.

PROJECTS

Insurify

📅 09/2017 - 07/2018

🔗 <https://insurify.com/>

Insurify is an American insurance comparison shopping website headquartered in Cambridge, Massachusetts.

- Created site's blog from scratch for marketing purposes with ability to theme customization.
- Custom WordPress themes creation, allowing the client to take control over the content of the website.
- Contributed in marketing website ensuring the better implementation of SEO.
- **Tech environment:** HTML, CSS, JavaScript, Bootstrap, jQuery, Backbone.js, SASS, React, Django templates, Grunt, WordPress, Python, Django, MySQL, Git, GitHub.

TenMarks Education (An Amazon Company)

📅 09/2015 - 09/2017

🔗 <http://www.tenmarks.com/>

TenMarks Education, Inc. provides personalized online math practice and enrichment programs for K-Algebra/Geometry using a structured approach of practice, on-demand hints, video lessons and real-time results.

- Contribute to Marketing Website to create rich and optimized user interfaces.
- Implement web accessibility to entire application.
- Implement interactive and animated modules.
- **Tech environment:** HTML, CSS, SASS, Bootstrap, JavaScript, jQuery, jQuery UI, AJAX, JSP, JSTL, Handlebars.js, Highcharts, JAVA, Spring MVC, MySQL, Git, GitHub.
